Products with Intention

Aromatic Spray

Our handmade formulas are based on the principles of herbalism and aromatherapy. Formulated without preservatives or animal products using organic ingredients as they are available, we feature aromatic mists. The all purpose spray can be used on any household surface; made from purified water and liquid castile soap, it is gentle and effective. The glass spray uses the antiseptic power of white vinegar. The air spray can be diffused to spread the essential oil blends into any room in your home, office, car, closet or yoga studio. These aromatic mists all are made with blends of essential oils

Bliss Balm

Our moisturizing balm is designed for direct application of essential oils on the body. Best used right after a shower or bath when skin is slightly damp. Great for all types of skin in hot or cold weather. The balms are available in Geranium, lavender and Pink Grapefruit. They are made from Kokum Butter, which is cold pressed from the seed kernel, organic jojoba oil, vitamin E, which has anti-oxidant properties and candelilla wax found on the leaves of plants native to the Southwest.

Mission

Our mission is to formulate pure products that create harmony and balance. They are made by hand to be fragrant and effective without fillers, animal products, preservatives or synthetics. Our products are charged with intention and positive messages according to Dr. Masaru Emoto's research. They have antiseptic and vibrational qualities used throughout the ages to enhance the body, mind and spirit.
