Products with Intention

JAI Cleansing Mists

Our handmade formulas are based on the principles of herbalism and aromatherapy. Formulated without preservatives or animal products, we use organic ingredients whenever possible and feature three different environmentally friendly, chemical-free products. The *all purpose spray* can be used on any household surface. Made from purified water, liquid castile soap and white vinegar. It is gentle and effective. And the *air spray* can be diffused to spread the essential oil blends into any room in your house, office, closet or yoga studio.

Jai Body Care

Our moisturizing balm is designed for direct application of essential oils on the body. Best used right out of the shower or bath when skin is slightly damp. Great for all types of skin in hot or cold weather. The balms are available in Ginger, Geranium and Lavender blends. Made from mango butter- cold pressed from the seed kernel, organic virgin coconut oil, organic jojoba oil, vitamin E, which has super anti-oxidant properties, and candelilla wax, a light wax found in the leaves of plants native to the South-west and Mexico. Our Bliss Balm has a long lasting scent for the skin and lips.

Mission

Our mission is to formulate pure products that create harmony and balance. They are made by hand to be fragrant and effective without fillers, animal products, preservatives or toxins. Our products are charged with positive messages according to Dr. Masaru Emoto's research and have both antiseptic and vibrational qualities used throughout the ages for body, mind and spirit.
